Medicare CAHPS (MCAHPS) 2023 Data Dictionary
FFS CAHPS

RAND MCAHPS Project Team

Funded by the Centers for Medicare & Medicaid Services

This data dictionary was generated for CCW to support the requested 2023 data files generated April 2024

Version 2, Volume 2

I. User Guide

The table below details the Medicare Consumer Assessment of Healthcare Providers and Systems (MCAHPS) survey types, sample coverage, and type of care assessed. The table is included to provide context for the contents of this data dictionary as well as information on the specific years for which different types of data are available.

Glossary of 2007-2023 MCAHPS Survey Types and Coverage*			
Survey Type	**Administered to Following Coverage Type**	**Care Addressed**	**Years**
Medicare Advantage Prescription Drug (MA-PD)	MA-PD	All aspects of care (Part C and Part D)	2007-2023
Medicare Advantage Only (MA-Only)	MA-Only	Part C aspects of care (there is no Part D)	2007-2023
Medicare Advantage Preferred Provider Organization (PPO)	MA-PPO	All aspects of care (Part C and Part D)	2008-2012
Prescription Drug Plan (PDP)	FFS+PDP	Part D aspects of care	2011-2023
Fee-For-Service (FFS)	FFS-Only and FFS+PDP	Non-Part D aspects of care	2011-2023
Fee-For-Service Only (FFS-Only)	FFS-Only	Part C aspects of care (there is no part D)	2007-2010
Fee-For-Service and Prescription Drug Plan (FFS+PDP)	FFS+PDP	All aspects of care (Part C and Part D)	2007-2010

*Note: No MA and PDP CAHPS survey administration occurred in 2020.

This data dictionary is presented in two volumes (indicated by Version 2 on the title page). Volume 1 contains content specific to the Medicare Advangage (MA) and Prescription Drug Plan (PDP) CAHPS surveys. Volume 2 contains content specific to the Fee-For-Service (FFS) survey. Other data dictionaries are presented in a combined format (indicated by Version 1 on the title page).

Summary of Sections

II. 2023 MCAHPS Data Contents

This section summarizes the variables included in the requested data. The table below describes the sources or types of variables in the data. Part A of this section includes a list of all variable names as well as variable labels and formats. The standard file format is SAS and the format program included with the data delivery should be used with the data to view formatted values. The second table in this section provides a more detailed description of particular variables of interest. Part B includes the valid values for each variable, displayed in alphabetically sorted tables for each variable. Variables without formats (i.e. text variables, dates, etc) are not presented here.

Variable Types in the MCAHPS Survey Data		
Variable Type	**Variable Prefix**	**Description**
Analytic survey variables	Varies according to question topic (i.e. ma_, ins_, ca_, etc)	Variables that directly correspond to survey items
Derived variables	ws_	Variables created during data processing to summarize survey completeness
Survey processing variables	su_	Variables created by survey vendors to identify information about data collection
Administrative variables	sa_	Variables that contain enrollment and demographic information about the beneficiary
Reverse-coded variables	r_	Reverse-coded variables that directly correspond to the original survey variables

III. 2023 Question and Variable Key

The question key table provides exact question text for each survey item and the corresponding analytic variable name. This table also identifies which survey types contain a specific question along with the question number for that survey. Any differences in question text associated with survey version are noted.

IV. Crosswalk: 2007 to 2023

The crosswalk tables summarize the presence of analytic variables across all years of survey administration. There is a separate crosswalk table for each survey type. The crosswalk tables document the question number for each survey item in each year and whether the item should be reverse-coded for analysis.

V. Composites: 2007 to 2023

The composite crosswalk tables summarize the composite items across all years of survey administration. There is a separate composite crosswalk table for each survey type. The composite crosswalk tables document the question number for each survey item in each year and the survey items that comprise each composite.

II. 2023 MCAHPS Data Contents

A. 2023 MCAHPS Analytic Data Contents

The following table is a complete list of all variables in the 2023 MCAHPS analytic data. In addition to analytic survey variables, these data contain several administrative and derived variables. These variables names begin with character combinations to indicate that they are not survey variables and their meanings are as follows:

- **ws_ - Westat derived variables**

- **su_ - Survey processing variables**

- **sa_ - Administrative variables**

- **r_ - Survey variables with response categories reverse-coded**

The following table provides additional details for a subset of variables from the preceding variable contents table

Variable	Detailed Variable Description
MCAHPS_ID	Randomly assigned identifier used to de-identify beneficiaries within a single MCAHPS year
	This variable cannot be used to merge beneficiaries across other years of MCAHPS data
SU_TYPE	Indicates to which survey the beneficiary responded (MA-PD, MA-Only, PDP, or FFS)
SA_TYPE	Indicates to which survey the beneficiary responded (MA-PD, MA-Only, PDP, or FFS)
	Note that SA_TYPE = 1 indicates MA-Only and SA_TYPE = 2 indicates MA-PD
	These values are reversed for SU_TYPE
SA_PFFS	PFFS plan type indicator
SA_MMP	MMP plan type indicator
SA_ST_ABBR	FIPS State Name Abbreviations, derived from SA_FIPS_STATE
INDIV_WT	Post-stratification weight for comparing patient subgroups and for national point estimates
FINAL_WT	Contract-level (state-level for FFS) weight for weighting scores for Star Ratings

B. 2023 MCAHPS Format Tables

The following tables summarize the formatted response options within each analytic variable.

Valid response options also include special missing values, which are summarized below.

. = QUEX NOT ASKED (question not asked on the survey type)
.A = MULTIPLE RESPONSES
.B = NOT ANSWERED (truly missing)
.D = DON'T KNOW (possible only as a CATI response)
.G = APPROPRIATE SKIP (screener response warrants a skip and no response was given)
.I = INCONSISTENT RESPONSE (response to a prior question contradicts this response)
.J = DON'T KNOW SURVEY OPTION (Don't Know survey response option)
.K = INAPPROPRIATE ANSWER (screener response warrants a skip, but response was given)
.L = INAPPROPRIATE SKIP (screener response warrants an answer, but no response was given)
.N = NA SURVEY OPTION (tailored skip)
.R = REFUSED (possible only as a CATI response)

IV. Crosswalk: 2007 to 2023

The following tables contain crosswalk information for 2007 to 2023. The tables include all analytic variables and question numbers across all years and survey types, along with several indicators with additional information. The following key describes these indicators.

D: DROPPED

—: QUESTION NOT ASKED ON THIS SURVEY TYPE

R: ITEM MUST BE REVERSED PRIOR TO ANALYSIS

*: COMPOSITE ITEM/GLOBAL RATING

VARIABLE DIFFERENCES:
proxy, proxy_read, proxy_writ, proxy_answ, proxy_tran, and proxy_othr were proxy questions asked on mail mode cases only in 2007-2011. proxy_othr_txt was a proxy question only asked on mail mode cases in 2007-2010.

V. Composites: 2007 to 2023

The following tables contain composite crosswalk information for 2007 to 2023. The tables include composite names, items that contribute to the composite, and question numbers across all years and survey types. The following key describes these indicators.

D: DROPPED

——: QUESTION NOT ASKED ON THIS SURVEY TYPE

X: ITEM NOT PART OF COMPOSITE

C: COMBINED ITEMS VARIABLE

^: COMBINED ITEMS

A. FFS Survey

The following table shows composite crosswalk information for the FFS survey. [2]
